

## **FOR IMMEDIATE RELEASE**

### **Miele Canada Introduces New Undercounter Drawer Refrigerator and Launches ArtLine Obsidian Black Design**

**Toronto, ON – May 7, 2026** – Miele Canada is pleased to announce the KU 7175 D undercounter drawer refrigerator, expanding its premium refrigeration portfolio with a flexible new cooling solution designed for modern kitchens. Now available in Canada, the innovative two-drawer refrigerator delivers advanced storage versatility in a compact, built-in format.

Designed to integrate seamlessly into contemporary kitchen environments, the new model reflects Miele’s commitment to combining intelligent functionality with refined design. As kitchen layouts continue to evolve, particularly with the growing popularity of kitchen islands and open living spaces, the KU 7175 D provides a practical and stylish cooling solution that maximizes available space while maintaining optimal storage conditions.

#### **Flexible Cooling for Modern Kitchens**

The KU 7175 D introduces a unique two-drawer concept featuring fully independent temperature zones, allowing each drawer to be set individually within a temperature range of 0 °C to 14 °C (32 °F to 57 °F). This flexibility enables users to store beverages, fresh ingredients, and everyday essentials at their ideal temperatures, ensuring freshness and convenience throughout cooking and entertaining.

Unlike conventional drawer refrigerators that rely on a single cooling circuit, Miele’s design allows each drawer to operate independently, providing greater precision and versatility for a wide variety of storage needs.

“Modern kitchens are increasingly designed around flexibility and shared living spaces,” said Nelson Fresco, President & CEO, Miele Canada. “With the KU 7175 D, we’re introducing a solution that brings precision cooling and thoughtful organization into a compact format that fits naturally into today’s kitchen designs.”

#### **Intelligent Design and Seamless Integration**

The panel-ready design allows the refrigerator to blend effortlessly into custom cabinetry, creating a fully integrated appearance that supports both minimalist kitchen aesthetics and personalized design concepts. Smart connectivity via Wi-Fi integration offers added convenience, allowing users to monitor and control their appliances remotely.

#### **Designed for Everyday Use**

With two spacious drawers and intuitive organization, the refrigerator supports multiple use cases from storing chilled beverages for entertaining to preserving fresh ingredients, and everyday cooking essentials. Even air circulation, supported by Miele’s DynaCool technology, ensures consistent temperatures throughout, helping maintain freshness and quality.

The product expands Miele's KU 7000 undercounter refrigeration range, strengthening the brand's offering of compact cooling solutions adapted to the evolving needs of today's kitchens.

## **ArtLine Obsidian Black: The Next Evolution in Design**

Miele Canada is pleased to announce the launch of its ArtLine Obsidian Black built-in cooking appliances. Representing the next generation of Miele's all-black design language, the new finish replaces the current ArtLine Black Matte aesthetic with a fully integrated black-glass front, creating a seamless and refined appearance across the kitchen.

While the design evolves, product specifications, features, and pricing remain unchanged, ensuring customers continue to enjoy the same high-performance cooking technologies that define the ArtLine series.
