FOR IMMEDIATE RELEASE

Miele introduces Full-Surface Induction Cooktops, bringing a new level of freedom to cooking

The latest addition to Miele's premium cooktop portfolio combines unrestricted cookware placement, intelligent controls and a durable, scratch-resistant surface

- **Full-surface induction technology** allows cookware to be positioned and moved freely without predefined cooking zones
- **DiamondFinish** coating provides more than twice the wear resistance of conventional glass ceramic surfaces
- **Intelligent pan recognition** automatically adapts controls to the position of each pot or pan
- **SmartSelect White** offers intuitive operation with individually displayed controls for each piece of cookware

Vaughan, Ontario, November 2, 2026 – Miele is expanding its premium cooking appliance portfolio in Canada with the launch of its new Full-Surface Induction Cooktops. Designed for greater flexibility and convenience, the new cooktops eliminate traditional cooking-zone boundaries, letting home cooks position and move pots and pans freely across the surface.

Combining advanced induction technology with elegant design and intuitive controls, the new cooktops provide a more adaptable cooking experience. Available in 30-inch and 36-inch models, the lineup introduces several innovations, including Miele's DiamondFinish surface, SmartSelect White controls and intelligent pan recognition.

A new level of freedom in the kitchen

Unlike conventional induction cooktops with predefined cooking zones, Miele's full-surface induction technology lets you place cookware anywhere on the cooking surface, offering greater flexibility when preparing multiple dishes.

Whether you're using several pots and pans at once or accommodating larger cookware, the technology adapts to different cooking needs without the restrictions of fixed cooking zones. This flexibility is especially valuable when preparing elaborate meals or entertaining, letting home cooks rearrange cookware as needed throughout the cooking process.

DiamondFinish: Lasting Protection, Timeless Design

The new cooktops feature Miele's DiamondFinish coating, a specially developed glass ceramic surface designed to significantly reduce scratches from everyday use.

More than twice as wear-resistant as conventional glass ceramic surfaces, DiamondFinish helps preserve the cooktop's elegant appearance over time, combining durability with the refined aesthetic expected of Miele appliances.

Intelligent controls that adapt to your cooking
Miele's intelligent pan recognition technology makes the cooktop more intuitive to operate. When you place a pot or pan on the surface, the corresponding controls automatically appear in the right position.

As you move cookware, the associated controls follow, eliminating the need to manually reassign cooking zones. The controls appear only when cookware is detected, keeping the cooktop clean and minimalist.

Complementing this technology is SmartSelect White, which provides dedicated numerical controls for each piece of cookware. You can adjust power levels and timers quickly and easily, offering precise, convenient control throughout the cooking process.

Elegant design for the modern kitchen
Designed to complement a variety of kitchen styles, Miele's Full-Surface Induction Cooktops are available in both stainless-steel framed and frameless configurations.

Install frameless models flush with the countertop for seamless integration, or above the countertop; framed models feature a stainless-steel surround for a classic, refined look.

The Canadian assortment includes four models: KM 7737 FR Diamond and KM 7737 FL Diamond in 30-inch configurations, and KM 7747 FR Diamond and KM 7747 FL Diamond in 36-inch configurations.

“Today's consumers are looking for appliances that combine exceptional performance with greater flexibility and ease of use,” said Michael Ferreira, Vice President of Sales at Miele Canada. “Our new Full-Surface Induction Cooktops deliver exactly that, giving home cooks the freedom to prepare meals without the limitations of traditional cooking zones. With innovative features like intelligent pan recognition and DiamondFinish, we're bringing a new level of convenience, durability and sophistication to Canadian kitchens.”

Canadian availability
Miele's new Full-Surface Induction Cooktops launch in Canada on November 2, 2026. For more information, visit Miele.ca or contact a Miele Experience Centre or authorized Miele retailer.
